

MACNEIL EXPRESSLANE

DRIVE-THROUGH SYSTEM

Drives CSI, Volumes and Revenues

The MacNeil ExpressLane Drive-Through system is ideal for automotive dealers, fleet operators and rental agencies seeking to integrate a vehicle wash center into the core operation – either as a value-added service or profit center. Requiring minimal space and no complex plumbing or electrical work, the ExpressLane Drive-Through system helps drive traffic to your location, boosting customer satisfaction and bottom-line revenues. And like every customized MacNeil solution, the ExpressLane Drive-Through system ensures a superior clean with maximum throughput and uptime, thanks to high-quality, low maintenance components.

PROVEN TECHNOLOGY MAXIMIZES THROUGHPUT AND ECONOMIZES ON SPACE

> THE MACNEIL ADVANTAGE

- Minimal space with no complex plumbing or electrical requirements
- Excellent wash consistency
- Superior throughput
- Minimal prep work
- Optional keypad code entry facilitates simple usage tracking
- Electric-drive brushes reduce noise and maintenance
- Revolutionary top brush provides superior wash results over mitter systems
- Rugged design stands up to operating conditions

> EQUIPMENT OVERVIEW

Guide rails provide easy, accurate vehicle navigation

Presoak arch applies water and chemicals to vehicle at start of wash

Top brush outperforms mitter systems in cleaning horizontal surfaces

Wrap around brushes provide maximum cleaning power for vehicle front, sides and rear

Quiet, electrically driven brushes are fabricated with MacNeil Envirosoft foam: thicker, wedge-shaped fingers are gentler on vehicle extrusions and safer on vehicle finish

Rinse arch applies rinse water, waxes and drying agent, as specified

Optional drying system incorporates MacNeil's patented Tech 21 featuring three 10 HP fixed nozzle drying units

Wash control center integrates all wash components into one easy-to-use control unit

Drive through or **drive in back out** configurations

> TECHNICAL DATA

- Water supply – 18 GPM, 50 PSI, 1" water line to water manifold
- Air supply – 90 PSI, 1/4" line, 1 CFM

Electrical

- Wet wash – 3 electric motors (0.9 KW, 3 phase, 208V, 60HZ) and three variable frequency drives (1.1 KW, single phase, 200V, 60HZ)
- Dry wash – three 10 HP dryers, 208V, 60 HZ

> SPACE REQUIREMENTS

	Length	Width	Height
Wet Wash (No Dryer)	29'	15.5'	12'
Dry Wash (30 HP Dryer)	39'	15.5'	12'

> OPTIONAL EQUIPMENT

- MacNeil Tech 21 30 HP drying system
- Rocker panel brush
- Code activation system

* Model A illustrates the Drive-Through system with optional dryer component.

* Model B illustrates the Drive-In & Back-Out system with optional dryer component.

> ABOUT MACNEIL WASH SYSTEMS

MacNeil Wash Systems was established in 1982. The Company designs and manufactures quality car wash systems for the tunnel car wash industry and for the automotive dealer, fleet and rental markets. MacNeil products are engineered to provide superior cleaning performance, reduced maintenance, increased production, maximum cost savings and equipment longevity. All MacNeil equipment is backed by our focus on service excellence. We distribute and support our products through a North American network of more than 40 distributors that is second to none in capability and performance.
