# Eliminate the High Cost of Wheel Cleaning.

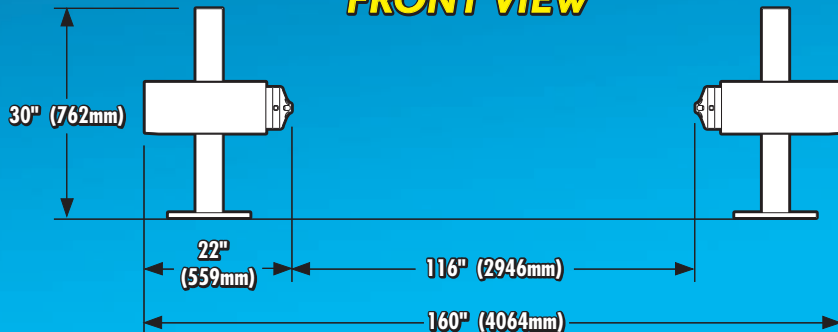

The Eliminator FF with its full force cleaning action is designed to clean the three areas that require the most extensive manual prep work – the wheels, the lower rocker panels and running boards. It incorporates a unique oscillating action that guarantees intense cleaning coverage and will not go unnoticed by your customers. The optional Following Feature doubles the amount of cleaning time and coverage range by following the vehicle as it travels through the wash.

## PLAN VIEW

## FRONT VIEW

## Features
