

*The Best in Automatic Car Wash Systems*

### **MACNEIL WASH SYSTEMS LAUNCHES ENERGY SAVING AIR VALVE FOR DRYERS**

**Barrie, Ontario, Canada – April 25, 2007** – In a continued effort to help operators reduce overhead costs, MacNeil Wash Systems is proud to announce the launch of the PowerLock, an energy saving air valve for 10hp and 15hp Tech21 Producers.

The product mounts to the front of the fan acting as a valve, blocking air intake between vehicles. Computer controls connect all PowerLock functions, providing instantaneous airflow response for approaching vehicles. This innovative new product allows the dryer motors to remain running – eliminating costly cycling – while providing immediate response time and a significant cost savings!

The new PowerLock is available for new units or as a retrofit kit for existing Tech 21 dryers.

#### **About MacNeil Wash Systems Limited**

MacNeil Wash Systems was established in 1982 and is an ISO 9001:2000 certified manufacturer. The company designs and manufactures quality car wash systems for the tunnel car wash industry and for the automotive dealer, fleet and rental markets. MacNeil products are engineered to provide superior cleaning performance, reduced maintenance, increased production, maximum cost savings and equipment longevity. All MacNeil equipment is backed by our focus on service excellence. We distribute and support our products through an international network of more than 45 distributors that is second to none in capability and performance.
