

MACNEIL CELEBRATES OPENING OF DOUBLE TUNNEL IN CALIFORNIA

Barrie, Ontario, Canada - December 1, 2009 - Richard Castellow, Western Regional Sales Manager, MacNeil Wash Systems, is pleased to announce what promises to be one of the most exciting car wash projects in the Western United States in many years.

"The Speedwash express car wash in Victorville, California is truly unique in all aspects" says Castellow. "The wash is laid out in a park-like setting with some of the most interesting topographic and architectural design I've ever seen at a car wash. Its high, open ceilings, futuristic design, and 'green' technology clearly reflect the evolution of customer expectations."

Located on Industrial Blvd. off of Bear Valley Road - a major through fare for Apple Valley and Victorville - the car wash is in a prime location to serve a growing California market. Traffic flow in the area exceeds 70,000 cars per day and the site rests centrally to serve a population of approximately 200,000 people.

MacNeil Wash Systems is very proud to be involved with this project. It is a testament to the tenacity and vision of Specialty Car Wash Systems, MacNeil's Southern California distributor and service provider, as well as the ambition of Faramarz Simab and Pedram Fararoy to invest in this unique concept.

Victorville's first express car wash, Speedwash features two side-by-side 125' conveyor tunnels, and utilizes some of the latest state-of-the-art technology. "The wash is a green project from top to bottom" states Herschel Kilgore, Vice President of Specialty's Tunnel Wash Division. "It uses recycled water, eco-friendly wash chemicals, VFDs and automated wash processes for maximum efficiency, and it is even solar ready."

There has been a lot of discussion amongst industry experts about this site and the layout of the car wash. It is ambitious in all aspects, from the double tunnel concept, to the use of new technology and its environmentally-focused design. Speedwash promises to be a centerpiece not only for Southern California, but for MacNeil as well.
