

The Best in Automatic Car Wash Systems

For Immediate Release

MACNEIL EQUIPMENT NOW AVAILABLE IN

“COLORS THAT CLEAN”

Barrie, Ontario, Canada – April 1, 2011 – MacNeil Wash Systems is pleased to announce the expansion of their highly successful “**Colors That Clean**” program to include their full line of equipment. MacNeil’s “**Pro-Coat Finish**” is now available in a variety of colors, allowing operators more choice when designing and re-imaging their tunnels. Pro-Coat is a 3M process of powder coating that is durable, attractive, and easy to clean and maintain.

MacNeil recognizes that operators are in need of new and innovative tools to achieve the pleasing car wash experience desired by today’s consumers. In response to this, “**The Colors That Clean**” program was launched in mid 2010, to give operators a wider choice of foam colors. The attractive, vibrant colors and quiet, clean performance of MacNeil’s Envirosoft brush foam, along with the newly available Pro-Coat finish, create the ultimate car wash experience. The “**Colors That Clean**” will be available for viewing in the MacNeil booth #1425 at the ICA show being held in Las Vegas, May 2-4.

MacNeil Wash Systems is one of the world’s premier manufacturers of conveyor car wash systems, with dealer representation in over 20 countries worldwide. The company designs and manufactures high-performance car wash systems for the tunnel car wash industry and for the automotive dealer, fleet, and rental markets. MacNeil car wash systems integrate best-in-industry performance and operation standards for high ROI, superior customer satisfaction, and minimal maintenance.
