

# MACNEIL RG-440 CONVEYOR

AMERICA'S BEST CONVEYOR

## MacNeil RG-440 Conveyor

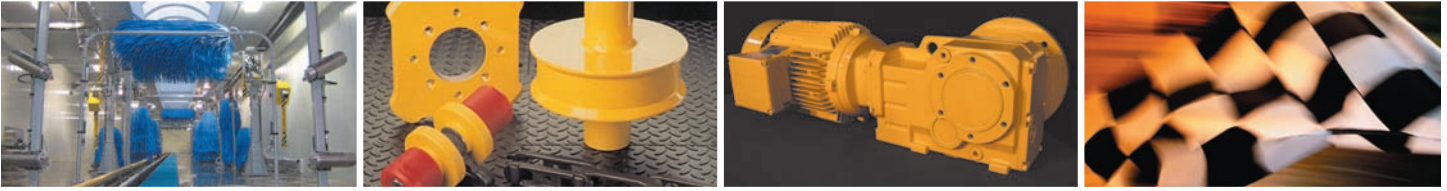

When it comes to building rock-solid conveyors, there's simply no substitute for experience. With a proven service and safety record spanning more than 20 years, our RG-440 lets you rest easy, knowing our investment in design, detail and development is protecting your investment.

- > Features: Forged long link X458 chain
- The safest and most reliable anti-jam on demand roller-up system
- Quad air shocks for constant chain tension and no conveyor jamming
- Air tensioned take-up
- Rugged, dependable drive (electric or hydraulic)
- Absence of ball bearings eliminates over-greasing and damaged seals
- Trap doors provide safe and simple operation
- Manual roller-up ensures continuous operation in the event of cylinder failure
- Interconnecting chain and roller design provides 52,000 lbs. of tensile strength
- Remote grease points guarantee cleaner, easier maintenance
- Best service and safety record in the industry
- Available in electric or hydraulic drive

**Get the best conveyor. Get MacNeil.**

# MACNEIL RG-440 ELECTRIC DRIVE CONVEYOR

## MacNeil RG-440 Electric Drive Conveyor

- > Benefits:
  - Reduced electrical consumption
  - No hydraulic hose or piping installation – no hydraulic leaks
  - Reduced installation costs
  - Extremely quiet operation
  - Accurate speed adjustments
- > Features:
  - Variable Frequency Drive (VFD) provides speed adjustments from 50-120 cph (3 HP motor) and 100-160 cph (5 HP motor)
  - Soft Start feature through VFD allows motor and gearbox to spool up, extending life of all components
  - Amperage load sensing technology built into the VFD for added safety
  - Rugged design with aluminum and stainless steel construction
  - Synthetic “Lube for Life” gear box lubricant – no oil changes necessary
  - Includes high water level indicator
  - Retrofittable to existing hydraulic conveyors that use Heco™ drives

**Get quiet. Get electric. Get MacNeil.**
