- 3/4" (19mm) LINE
- 40 PSI (3 BAR) Min. Pressure
- 4.5 GPM (17 LPM)/brush

Electrical

- 24V AC, 1.8A
- 110V AC, 0.5A
- CCS-Mini Controller included

How does the SuperFlex differ from other wraparounds?

The MacNeil RS-701 SuperFlex wraparound is truly unique in design and functionality. Our ability to control main and secondary arm movement allows the SuperFlex wrap to reach across the center of the vehicle providing exceptional dwell time and surface contact. 110 rpm core rotation speed and feather light side pressures dramatically enhance the RS-701's profiling movement around the shape of any vehicle providing a cleaning and polishing effect like no other wraparound available. Our 2nd generation Envirosoft foam material is the industry's answer to the need and desire for a quiet, gentle cleaning material that is safe and friendly to all vehicles. With these features in mind, the need for expensive prep work can be virtually eliminated keeping your profits where they should be. With over 25 years of manufacturing excellence and a commitment to our customers, we understand what is required to succeed in this challenging business. If you are a serious operator and want engineered quality and performance out of your investment in vehicle wash equipment, MacNeil Wash Systems has the answer. Get results! Get MacNeil!
