

ENVIROSOFT —FOAM—

A SAFE, QUIET CLEAN

High-quality microcellular closed-cell Envirosoft foam brushes allow faster line speeds and clean, quiet, safe operation. Available in vibrant colors, brush elements are easily replaced to extend the life of car wash equipment.

Safe, Fast, Clean & Quiet

Wedge-shaped lightweight foam reduces impact noise and allows high rotational speeds (110rpm) for higher conveyor throughput without sacrificing effectiveness. Closed-cell foam sheds dirt and repels water and chemicals to maintain a lightweight brush. Tapered foam fingers reach into crevices, and high-speed capability results in a sparkling clean.

Unbeatable Appeal

Vibrant colors and quiet, high-speed operation provides customers with a pleasant car wash experience. Lightweight, technically designed fingers gently clean for a sparkling finish. Operators benefit from the efficiency of higher speeds and increased throughput. Lightweight fingers reduce operating costs by increasing equipment life. Modular 'spider' design allows for easy maintenance and foam replacement.
